INSTRUCTION MANUAL
(DETAILED VERSION)

HIGH SPEED MULTI-TRANSDUCER

HSQT2-500

DAIICHI ELECTRONICS CO., LTD.

Contents

Introduction

Thank you for your purchase of DAIICHI product.
Please read this instruction manual carefully before use.
Keep this manual for future reference.
Please contact us in case this manual is lost or damaged.

Safety Precaution

■ Environment conditions

- Please be sure to use this product in a place that meets the following conditions. In places that do not meet this condition, malfunctions and failures, and performance and product life may be reduced.
  ① Within the range of ambient temperature (-10 to 55 ℃), humidity (5 to 90 % RH).
  ② Place free of corrosive gas. (Corrosive gas : SO_2 / H_2S, etc.)
  ③ Place free of dust, salt and oily smoke.
  ④ Location that is not affected by vibration and shock.
  ⑤ Location that is not affected by external noise.
  ⑥ Altitude 2000m or less.
- If the input to this product is an inverter output such as cycle control, SCR phase angle control and PWM control, measurement error may increase.

■ Outdoor use conditions.

① This product is not dustproof, waterproof, and splash proof.
Please avoid the place with much dust. Please do not install in the place directly exposed to the rain and water droplets. (IP code : IP30)
② Please do not install in the place directly exposed to the sun even through the glass.
Discoloration and degradation of a name plate, and deformation of the box by the surface temperature rise may cause.
③ Product life may shorten when the daily average temperature exceeds 40 ℃.

■ Mounting and wiring

Please refer to this instruction manual for installation and the wiring.

CAUTION	● Please refer to connection diagram for the wiring. An improper connection may cause generation of high voltage on the CT secondary side, and which may lead to device malfunction, burning or fire. ● Hot line work is prohibited. There is a risk of explosion by electric shock, device malfunction, burning, fire, or gas. ● Please use an electrical wire size suitable with the rated current. Use unsuitable size electric wire, which may lead to a fire. ● Please check the tightening of the screw. If the screws are loose, it may cause a fire or malfunction. ● The terminal cover is installed for preventing an electric shock accident. Please close terminal cover after wiring work.

■ Preparation

This product must be set before use. Please read this manual and make the setting correctly.
If you make a mistake on the setting it does not operate correctly.

■ Maintenance and inspection

① Inspection during energization is dangerous and prohibited.
② No replacement in periodic inspection.
③ Check for loose wiring and mounting screws.
④ Please wipe off lightly with the dry soft cloth for cleaning.
Please do not use organic solvents such as alcohol, chemicals, or cleaners.

■ Storage

When storing this product for a long period, please keep it in a place that satisfies the following environmental conditions.

- Within the range of ambient temperature (-20 to 70 ℃) and humidity (5 to 90 %RH).
- Place where average daily temperature does not exceed 40 ℃.
- Locations with little dust, corrosive gases, salt and oil smoke.
- A place not subject to vibration or shock.

■ Countermeasures against troubles

We will take back the actual product for repair in principle if it breaks down.

■ Disposal

Please dispose of this product as industrial waste (noncombustible).
Mercury parts and a nickel-cadmium battery are not used for this product.

■ Warranty period

The warranty period of the product is one year after the date of delivery.

■ Warranty scope

In the state of the normal use of product-specification within the range according to this instruction manual, this product in trouble within the warranty period will be performed exchange or repair gratuitously.
However, it is not warranted in the following cases.
① If it breaks down when converted or repaired without us.
② If it breaks down by use out of specification range.
③ If the cause of trouble is based on cause other than this product.
④ Damage and trouble by transportation, movement, and falling.
⑤ In other cases where the supplier is not responsible due to disasters, etc.
This warranty is a warranty only for the delivered product. Cannot warrant the damage induced by trouble of this product.

■ Replacement cycle of the product

We recommend updating the product for 10 years as a rough standard.

■ Change of instruction manual written contents.

This instruction manual changes written contents without a notice by product improvement etc.

Composition of type

Type: HSQT2-500-

Specification code

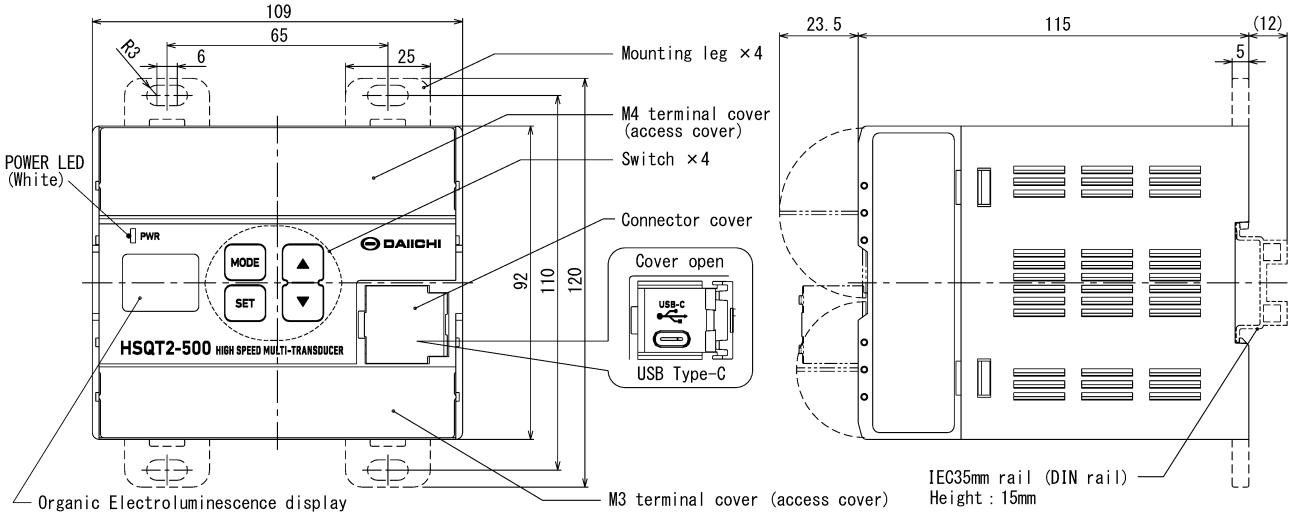
① Auxiliary supply	
1	80 to 264 V AC 80 to 264 V DC For AC and DC use
2	20 to 57 V DC

② Analog output			
1	0 to 5 V DC (600 Ω to ∞)	A	0 to 1 mA DC (0 to 10 kΩ)
2	0 to 10 V DC (2 kΩ to ∞)	B	4 to 20 mA DC (0 to 550 Ω)
3	1 to 5 V DC (600 Ω to ∞)	C	-1 to 1 mA DC (0 to 10 kΩ)
4	-5 to 5 V DC (600 Ω to ∞)	Z	Other (special specification)
5	-10 to 10 V DC (2 kΩ to ∞)		

1. Features of product

- Compliant with IEC60688：2012 (Transducer)、IEC62053：2003 (Static meters for active energy, Static meters for reactive energy).
- CE marking product
- Possible to change by setting. (Wiring type, rated voltage, rated current)
- High-speed response [Input, 1 cycle + 10ms or less/99%, Frequency: Input, 2 cycles + 15ms or less/99%]
- Standard equipment; 10-analog output, 2-pulse output, RS-485 Communication output (MODBUS).
- Connected to a PC with USB, you can write and read settings in dedicated software.
  About the setting software, it is downloadable from our web site.
  URL；https://www.daiichi-ele.co.jp/
- Using an organic electro-luminescence display of high contrast.
  Configuration changes, measurement items can be displayed.
- Wiring after installation can be confirmed in the test output by the front operation. To display the phase angle between the voltage and current, and supports the determination of the wiring mistake points.

2. Dimensions and part names



3. Bundled items

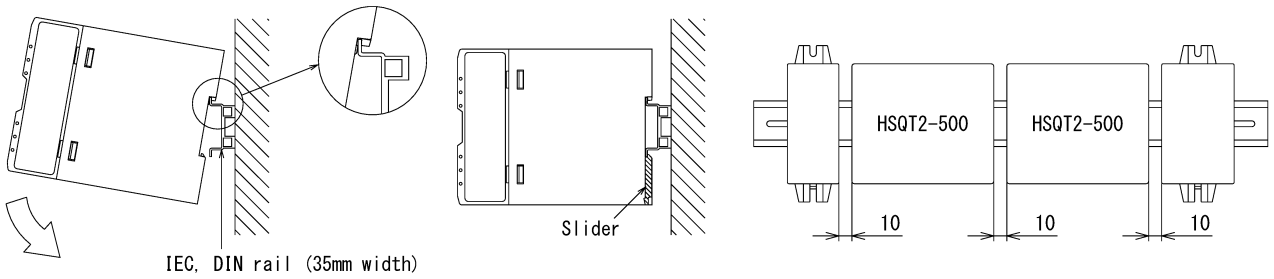
① Instruction Manual (Instruction･Operation) ····· 1
② Attachment tool ····· 4
③ Termination resister for communication (100Ω) ····· 1

4. Installation instructions

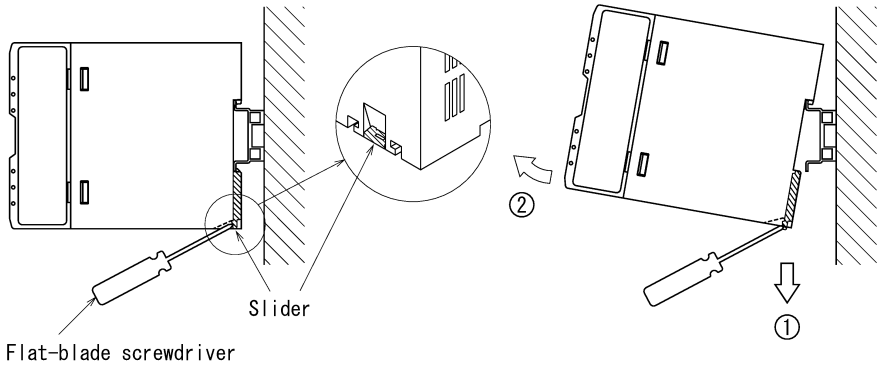
Please select indoors without low mechanical vibration, dust, and corrosive gas.
There is no limit of a mounting position.
A mounting means can be selected from IEC 35 mm rail (DIN rail) mounting and screw mounting.
Please separate the mounting side-by-side interval by 10 mm or more as a measure against heat.
Please consider heat and separate more than 10 mm of the interval of mounting side by side.
Please consider heat and wiring space and separate more than 90 mm of the space above and below.
Please secure the space distance of a terminal and a metal panel 10 mm or more.

<CAUTION> Please do installation of a product and removal after a power supply and an input signal are stopped.

■ Mounting the IEC 35 mm rail (DIN rail)
The product slider is at the bottom. Position the upper hook at the rear side of product on the DIN rail and push in the lower.

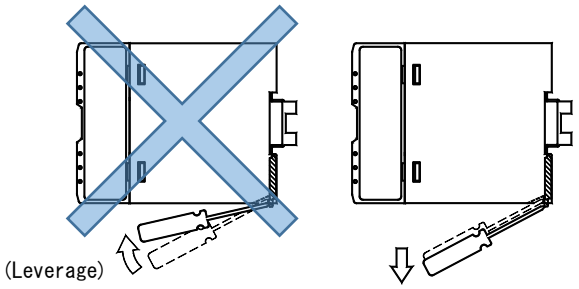


■ Removal from IEC 35 mm rail (DIN rail)
Insert a flat-blade screwdriver into the square holes of the sliders (2 places). While pulling out the two sliders in the direction of ① at the same time, pull up the product in the direction of ②.
The product can be removed from the rail by simply pulling out the slider 1.5 mm.

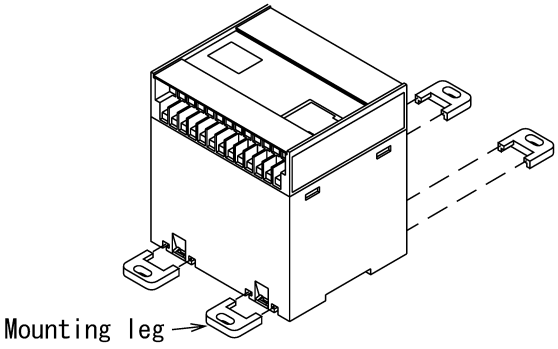


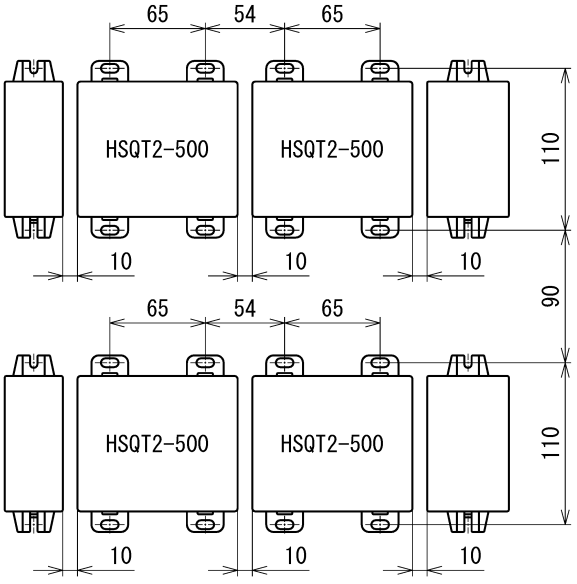
・Pull out the slider in two places at the same time.
・If the slider is pulled out 1.5mm, you can remove the product from the rail.

<CAUTION>
If you pull out the slider by moving the screwdriver like a lever, or pull up the product without pulling out the slider, the product may be damaged.



■ Screw mounting
Attach the included mounting leg (×4).
Please install with M4 screw or M5 screw.
Tightening torque, M4 : 1.00 to 1.30 N·m
Tightening torque, M5 : 2.00 to 2.50 N·m





<CAUTION> Please mount a product from the bottom to prevent a fall.

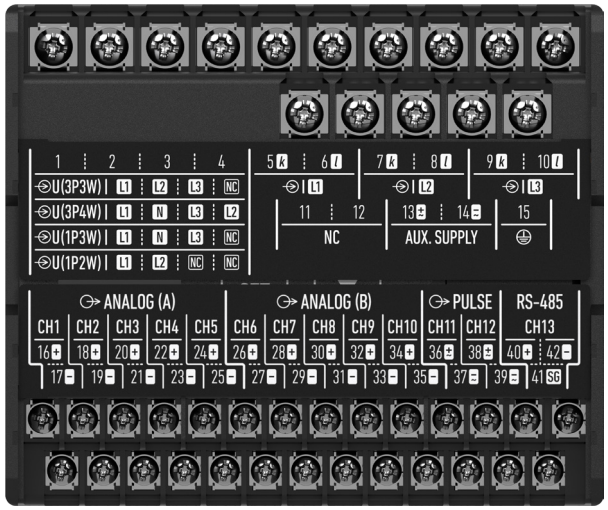
5. Connection

Open the terminal cover, please connections according to the wiring diagram below.
Terminal numbers and names are listed on the back of the terminal cover.

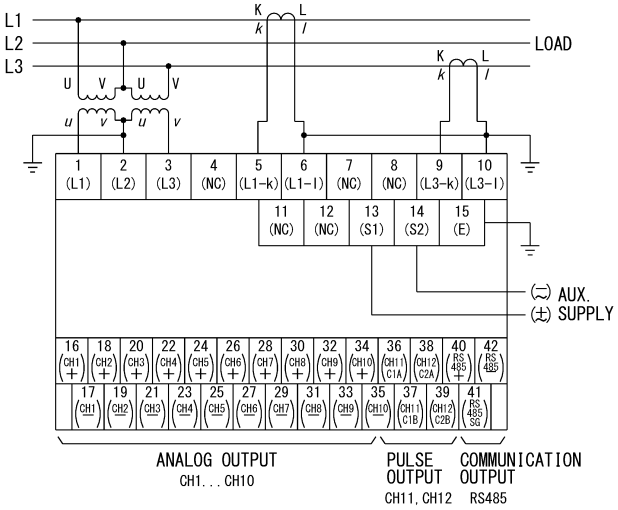
With terminal cover open

■ Upside terminal No.1 to 15
Auxiliary supply, Voltage, Current,
Ground terminal
Screw : M4 screw
Conformity crimp-type terminal
: Crimp-type terminal for M4 screw.
Outside diameter for terminal : 8.5 mm or less
Tightening torque : 1.0 to 1.3 N·m

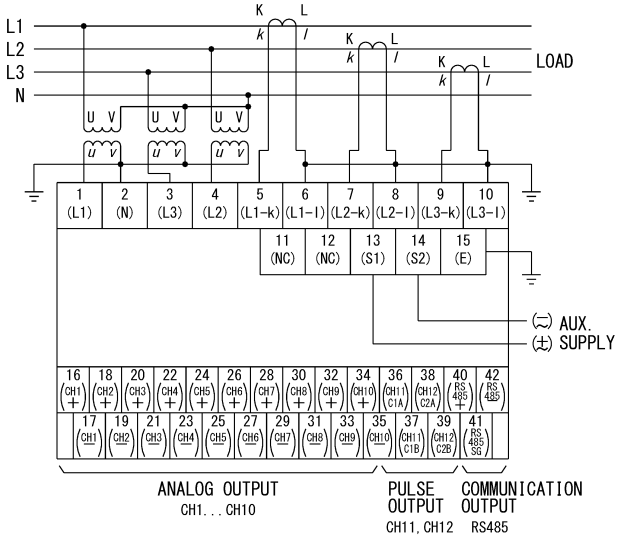
■ Downside terminal No.16 to 42
Analog output, Pulse output,
Communication output terminal
Screw : M3 screw
Conformity crimp-type terminal
: Crimp-type terminal for M3 screw.
Outside diameter for terminal : 6 mm or less
Tightening torque : 0.5 to 0.6 N·m



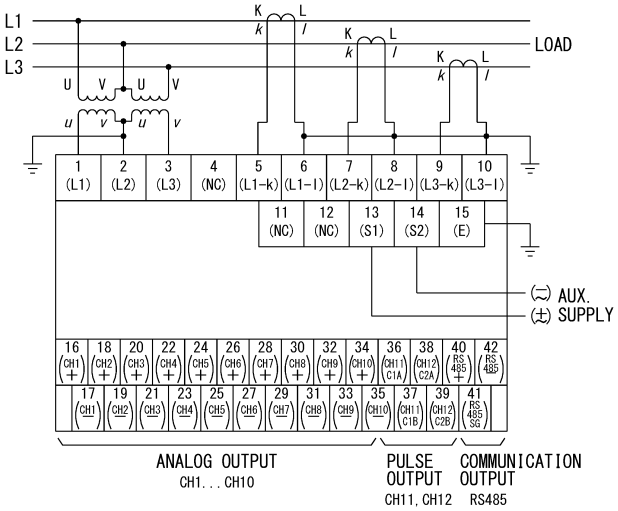
■ 3P3W [3-phase 3-wire] (2VT2CT)



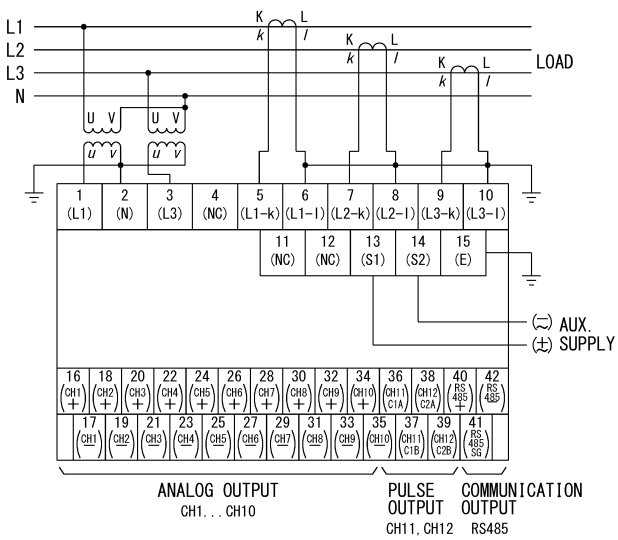
■ 3P4W [3-phase 4-wire] (3VT3CT)



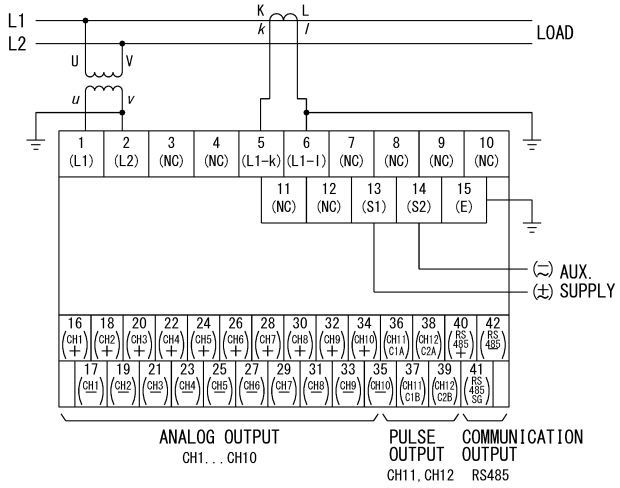
■ 3P3W [3-phase 3-wire] (2VT3CT)



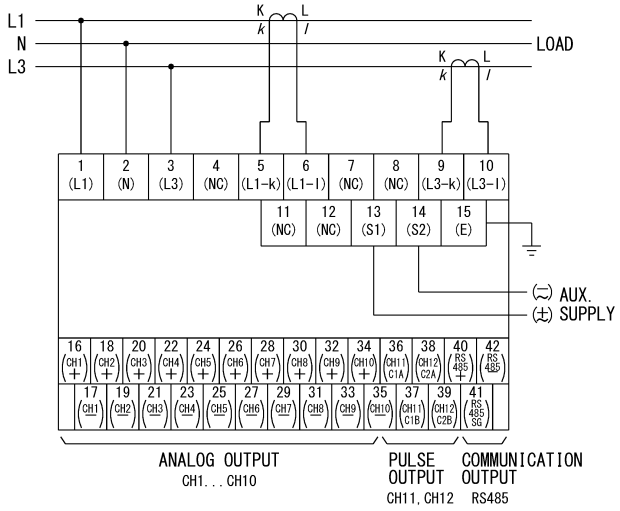
■ 3P4W [3-phase 4-wire] (2VT3CT)



■ 1P2W [1-phase 2-wire]



■ 1P3W [1-phase 3-wire]



・Maximum rated voltage

Wiring type	3P4W	3P3W (Ground)	3P3W (Ungrounded)	1P2W (Ground)	1P2W (Ungrounded)	1P3W
						Maximum rated voltage	277 V (L-N) 480 V (L-L)	220 V (L-L)	480 V (L-L)	220 V (L-L)	480 V (L-L)	220 V (L-N) 440 V (L-L)

・In the case of the low-pressure circuit (600 V or less), the secondary grounding of VT / CT is not required.

・Ground terminal (No.15), please be sure to ground. Ground is a class D grounding (grounding resistance less than 100 Ω).

・When using with three-phase four-wire (2VT3CT), voltage balance is a condition.

・Output wiring and the noise source (power line, steep voltage, the wire there is a current fluctuation), please release as much as possible. Please use a twisted cable or twisted cable shielded.

・Minus (-) terminals are connected internally of analog output CH1 to 5. (Common, Non-isolated)
Minus (-) terminals are connected internally of analog output CH6 to 10. (Common, Non-isolated)

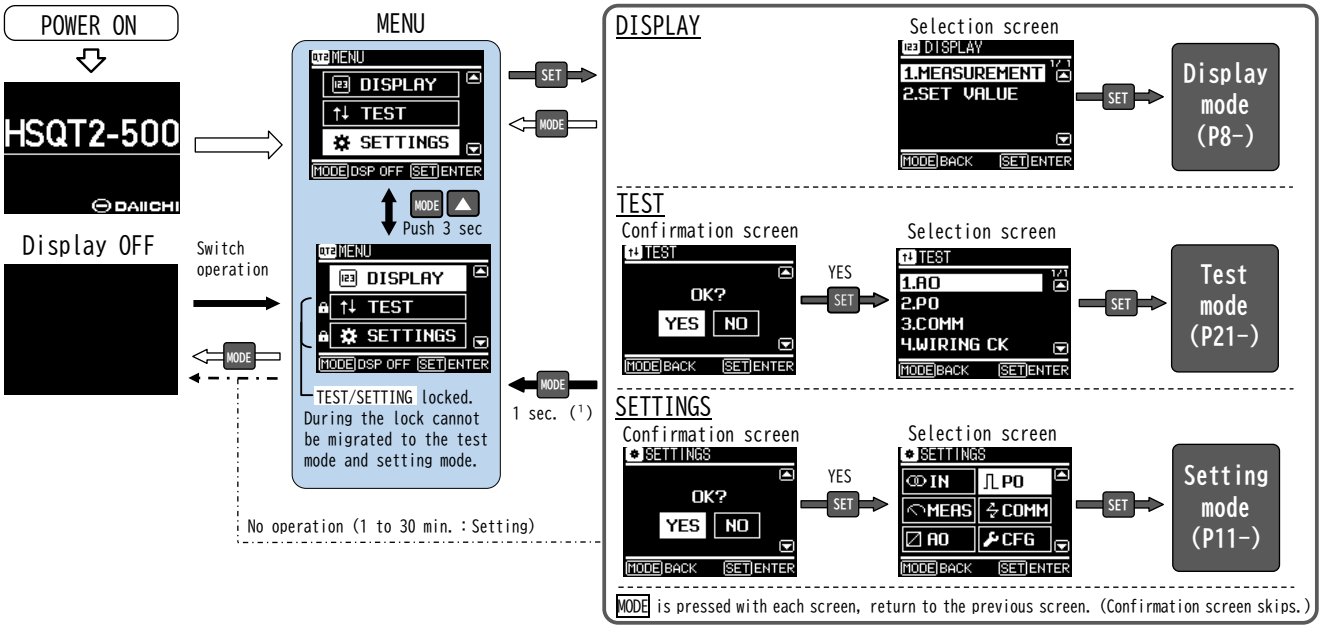
・Be used open the analog output terminal (current output), there is no damage to this product.

・Termination resistor for the communication output, please use at the end of equipment.
Please connect the termination resistor between the RS-485 of (+)(-) terminals.

・After the wiring work, please close the terminal cover.

6. Operation and Screen

6.1 Basic operation



Note (1) By pressing and holding the switch for more than one second, it returns from each of the screen to the MENU screen.

6.2 Screen structure

・Screen display

Example : MENU

■ Display name

■ Main display
Display the item, settings, measurement etc..

■ Lock icon
Displays at the time of the test / setting locked.

■ Cursor position (highlight)

■ USB icon
Displayed when connected to a USB port.

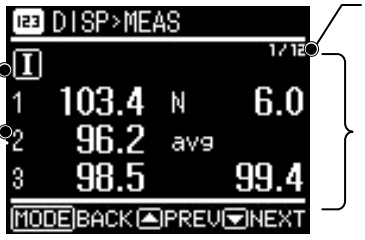
■ Switch icon
Displayed when the ▲ and ▼ of the operation is required.

■ Operation guidance
Display the operation at the time of switch operation.

7. Display modes

7.1 Measurement display

(1) Display



■ Measurands

■ Phase / line display

■ Page No.
Current page / Total pages

■ Measurement value
Input is converted into the %.
Example : 110 V, 5 A

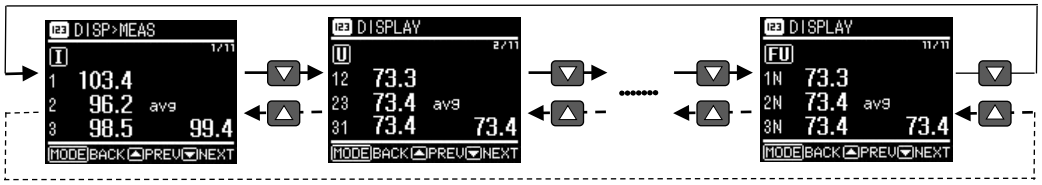
I	0 to 5 A	0 to 100.0 %
U, FU	0 to 150 V	0 to 100.0 %
P/Q/S	-1 kW/kvar/kVA to 1 kW/kvar/kVA	-100.0 to 100.0 %

Displays the actual measured values of power factor, frequency, and active and reactive energy. Refer to section 10.4 for details.

(2) Operation

① 【MENU】→ 「DISPLAY」 SET → 「MEASUREMENT」 SET → Measurement display mode.
② Select the measurement element to be displayed. (▲ ▼ switch)

No.1 Current display　No.2 Line voltage display　No.11 Fundamental voltage display



(3) Measurement item

Page	Measurement	Screen display	Wiring type			
			3P3W	3P4W	1P2W	1P3W
1	Current, Current (power flow)	I	1, 2, 3, avg (2)	1, 2, 3, N, avg (2)	I	1, 3, N
2	Line voltage, Phase voltage	U	12, 23, 31, avg (2)	12, 23, 31, LLavg 1N, 2N, 3N, LNavg (3)	U	13, 1N, 3N
3	Active power	P	Σ (2)	1, 2, 3, Σ (2)	P	Σ (2)
4	Reactive power	Q	Σ (2)	1, 2, 3, Σ (2)	Q	Σ (2)
5	Apparent power	S	Σ (2)	1, 2, 3, Σ (2)	S	Σ (2)
6	Power factor	PF	Σ (2)	1, 2, 3, Σ (2)	PF	Σ (2)
7	Frequency	f	f	f	f	f
8	Active energy	Wh	Incoming (+) / Outgoing (−)			
9	Reactive energy (Incoming)	+varh	LAG / LEAD			
10	Reactive energy (Outgoing)	−varh	LAG / LEAD			
11	Fundamental voltage	FU	12, 23, 31, avg (2)	1N, 2N, 3N, avg (2)	FU	1N, 3N

Note (2) avg : Average, Σ : Total.
Note (3) Since the line voltage and phase voltage that are displayed on two pages, the following page numbers are +1. (3P4W)

7.2 Setting value display

(1) Display

Example : Analog output settings

■ Page No.
Current page
/ Total page

■ Setting value
Display the set value
of the right table.

Page	Setting item	Display	Setting contents
1	Input	Top	Wiring type
		Center	VT ratio
		Bottom	CT ratio
2 to 11	Analog output	Top	CH No.
			Output factor
		Bottom	Input range for output value
12 13	Pulse output	Top	CH No.
			Output factor
		Bottom	Output pulse rate
14	Communication output	Top	CH No.
			Protocol
		Center	Address
		Bottom	Bit rate

(2) Operation

① 【MENU】→ 「DISPLAY」 SET → 「SET VALUE」 SET → Measurement display mode.

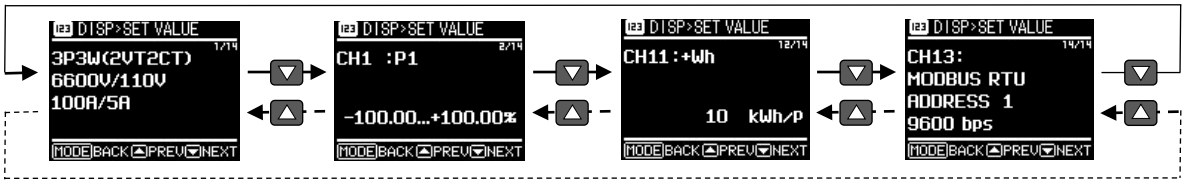
② Select the setting value to be displayed. (▲ ▼ switch)

No.1
Input settings

No.2 to 11
Analog output settings

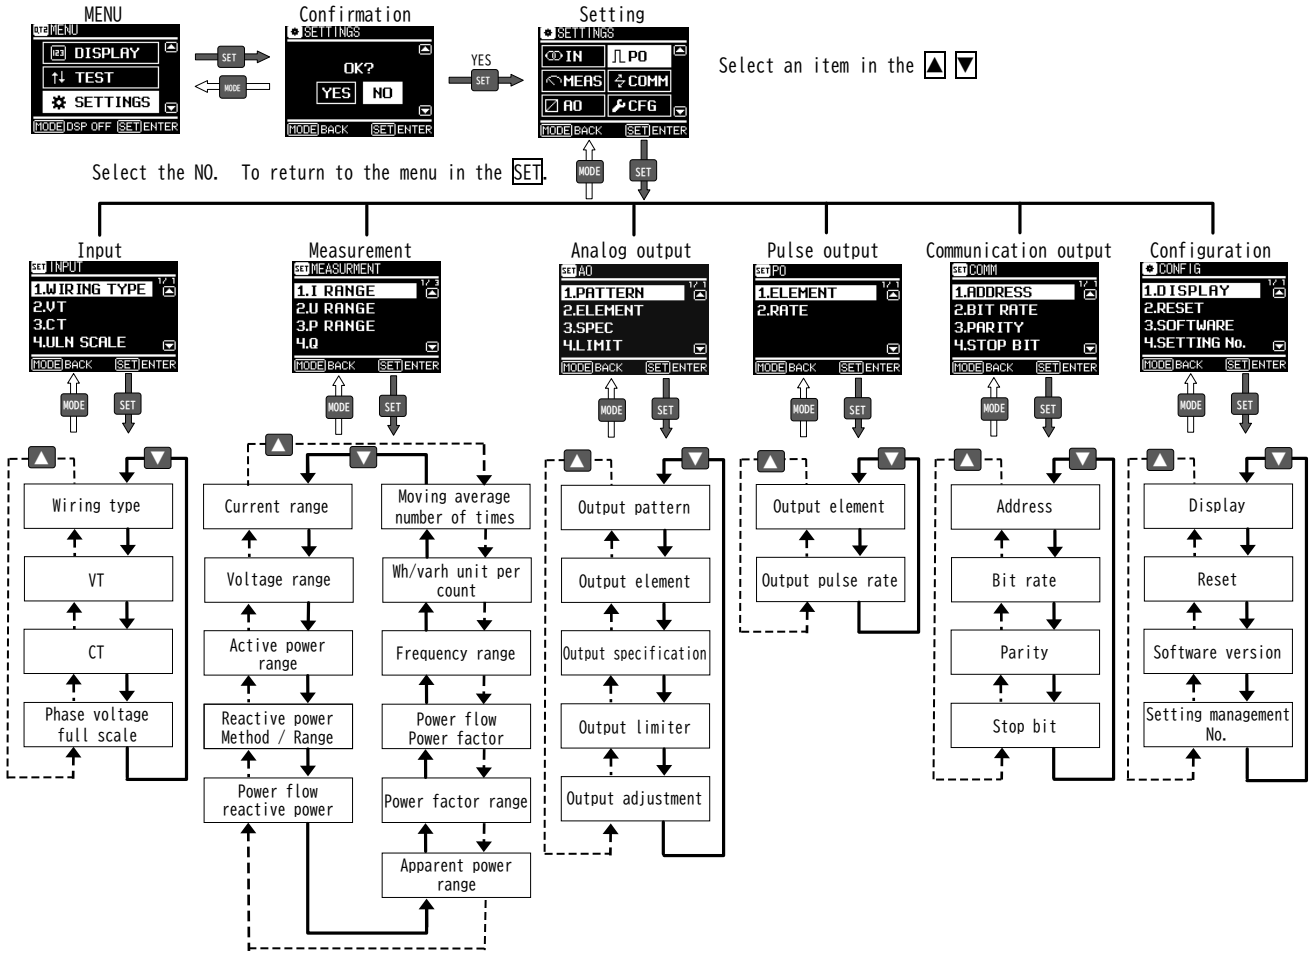
No.12,13
Pulse output settings

No.14
Communication output settings



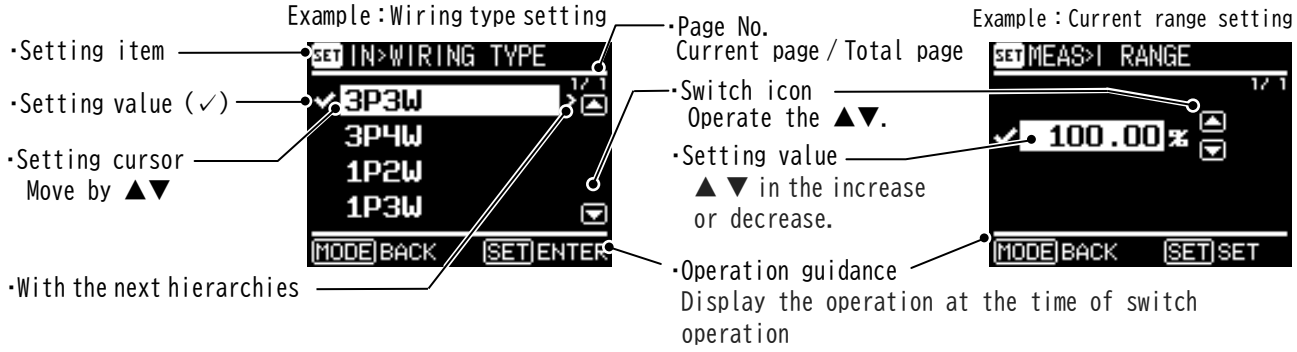
8. Setting modes

8.1 Setting flow



8.2 Setting method

(1) Display



(2) Operation

① Each setting display → Setting change of ▲ ▼ → Push SET (When indicating SET +, SET is pushed for more than 1 second.) → Enter

② When the setting is confirmed, to display the "✓" indicating the current setting in place of the changed setting value.

③ When ▲ ▼ is pushed lengthily, the set value changes at high speed.

8.3 Setting menu

(1) Input setting IN

<table>

Active energy	Incoming, Outgoing				1	2
Reactive energy	Incoming LAG, Incoming LEAD, Outgoing LAG, Outgoing LEAD				2	2

Note(8) The calculation method can be selected. $Q=UI\sin\phi$ or $Q=\sqrt{(S^2-P^2)}$
Note(9) Calculation method. 3P4W : $\Sigma S=U_{1N}\times I_1+U_{2N}\times I_2+U_{3N}\times I_3$, 3P3W : $\Sigma S=\sqrt{3}/2\times(U_{12}\times I_1+U_{23}\times I_3)$,
1P3W : $\Sigma S=U_{1N}\times I_1+U_{3N}\times I_3$

10.3 Detailed specification

Item	Specification, Performance
Conformity standards	Transducer, IEC 60688 : 2012, JIS C 1111 : 2019 Static meters for active energy, IEC 62053-21 : 2003, JIS C1271-1 : 2011 Static meters for reactive energy, IEC 62053-23 : 2003, JIS C1273-1 : 2011 Communication, TIA-485-A (2003)
CE marking	EMC Directive (2014/30/EU) EN 61000-6-2 EN 61000-6-4, EN 55011 classA, Group1 Low Voltage Directive (2014/35/EU) EN61010-1
Safety	IEC 61010-1 : 2010 Measurement Category Ⅲ, Maximum use voltage : 300 V (line to neutral), Pollution degree 2
Operating method	Current, Voltage : RMS value computing type. Active power, Active energy : Time-division multiplication method. Reactive power, Reactive energy : Time division multiplication method ($Q=UI\sin\phi$) or the method for calculating from the power and apparent power ($Q=\sqrt{(S^2-P^2)}$).(Selected in the setting) Apparent power : Calculates from voltage and current. Power factor : Calculates from power and reactive power. Frequency : Zero cross cycle computing type. Fundamental voltage : Fourier transform
Operation period	5ms (Frequency measurement : Input 1 cycle)
Influence of temperature	Usage group I 10 to 35 ℃ : Within class index. 0 to 45 ℃ : Within two times of a class index. -10 to 55 ℃ : Within three times of a class index.

Item	Specification, Performance	
Power interruption backup	Active energy, reactive energy, and each setting value are retained in non-volatile memory.	
Insulation resistance	Between electric circuit and ground.	50 MΩ or more at 500 V DC
	Between AC input and output (analog output, pulse output, communication output) and auxiliary supply.	
	Between analog output and pulse output.	
	Between pulse output and communication output.	
	Between pulse output 1 and pulse output 2.	
	Between analog output1 to 5 and analog output6 to 10 and communication output.	
	Non-insulation (Minus common) : Between analog output 1 to 5, between analog output 6 to 10.	
Voltage test	Between electric circuit and ground.	2210 V AC (50/60 Hz) 5 seconds
	Between AC input and output (analog output, pulse output, communication output) and auxiliary supply.	
	Between analog output and pulse output.	1390 V AC (50/60 Hz) 5 seconds
	Between pulse output and communication output.	
	Between pulse output 1 and pulse output 2.	
	Between analog output 1 to 5, analog output 6 to 10 and communication output.	500 V AC (50/60 Hz) 5 seconds
	Non-insulation (Minus common) : Between analog output 1 to 5, between analog output 6 to 10.	
Impulse voltage test	Between auxiliary power supply, AC input and ground. (Analog output, pulse output, and communication output are grounded)	6kV 1.2/50μs
	Between auxiliary supply and AC input, analog output, pulse output, communication output, ground.	
	Between AC input and auxiliary supply, analog output, pulse output, communication output, ground.	
	Between three-phase voltage input terminals.	
	Between auxiliary supply terminals.	
	Between pulse output and auxiliary supply, AC input, analog output, communication output, ground.	2.5kV 1.2/50μs
	Between external input and auxiliary supply, AC input, analog output, pulse output, communication output, ground.	
Damped oscillatory wave immunity test IEC61000-4-12	Peak voltage : 2.5 kV, frequency : 1 MHz ±10 %, Add 3 times for 30 seconds. Error : Within ±10 %. And, malfunction and communication stop must not occur. ・AC voltage input circuit (Normal / Common) ・AC current input circuit (Common) ・Auxiliary supply circuit (Normal / Common)	
Square impulse immunity test JEA B-402	Add noise (1μs, 100 ns width) repeatedly for 5 minutes. Error : Within ±10 %. And, malfunction and communication stop must not occur. ・Auxiliary supply circuit (Normal / Common) 1.5 kV or more ・AC voltage input circuit (Normal / Common) 1.5 kV or more ・AC current input circuit (Common) 1.5 kV or more ・Pulse output (Common) 1.0 kV or more ・Analog output (Induction) 1.0 kV or more ・Communication output circuit (Induction) 1.0 kV or more	
Radio wave immunity test	Radio wave band : 5W, 1m on 150 MHz, 400 MHz band. Cellular phone, wireless LAN : 2.4 GHz, 5 GHz band. Continued irradiation with radio wave on 0.5 m. Error : Within ±10 %. And, communication should communicate normally after a noise applying stop.	
Electrostatic discharge immunity test IEC 61000-4-2	Usually, it tests by the busy condition. When powered up. Air discharge : 15 kV, Contact discharge : 8 kV, Error : Within ±10 %. And, malfunction and communication stop must not occur. Capacitor charge system	
Vibration	IEC 60068-2-6 : 2007 Frequency range : 10 to 55 Hz, Single amplitude : 0.15 mm, Sweep cycle : 10 times	
Impact	IEC 60068-2-27 : 2008 Peak acceleration : 500 m/s^2 (Screw installation), 300 m/s^2 (DIN rail installation)	

Item		Specification, Performance
Overload capacity	Input	2 times 10 seconds and 1.2 times continuation of rated voltage. 40 times 1 second, 20 times 4 seconds, 10 times 16 seconds, 1.2 times continuation of rated current.
	Auxiliary supply	1.5 times 10 seconds and 1.2 times continuation of rated voltage. (100/110 V AC, 200/220 V AC, 24 V DC, 48 V DC) 1.5 times 10 seconds and 1.3 times continuation of rated voltage. (110 V DC, 220 V DC)
	Output	Voltage output : Short circuit for 1 second by 10 times at 10 seconds interval, and short circuit for 5 seconds, 70 % continuation of rated-output load. Current output : Open continuation, 130 % continuation of rated-output load.
Construction	Case outline	109×92 (With mounting legs, 120)×115 mm (W×H×D)
	Mass	Approx. 700g
	Material	Case : ABS (V-0) Terminal board : ABS (V-0) Terminal cover : PET-GF (HB)
	Terminal screw	Upper side terminal (Auxiliary supply, AC input, Ground terminal): M4 screw Lower side terminal (Analog output, Pulse output, Communication output): M3 screw
	Protection rating	IP30
Operating temperature and humidity limits		-10 to 55℃, 5 to 90% RH (Non condensing)
Storage temperature limits		-25 to 70℃

10.4 Measuring range

Measurands	Rated voltage / Rated current		Measuring range	Low input cut	Display
Current	—	5 A	0 to 5 A	Less than 0.2 % of the rated ([10])	0.0 to 100.0[%]
	—	1 A	0 to 1 A	Less than 0.5 % of the rated ([10])	
Current (Power flow)	—	5 A	Outgoing 5 A to Incoming 5 A ([11])	Less than 0.2 % of the rated ([10])	-100.0 to 100.0[%]
	—	1 A	Outgoing 1 A to Incoming 1 A ([11])	Less than 0.5 % of the rated ([10])	
Line voltage	110 V	—	0 to 150 V (1P3W : 0 to 300 V)	Less than 1 % of full scale	0.0 to 100.0[%]
	220 V	—	0 to 300 V (1P3W : 0 to 600 V)		
	440 V	—	0 to 600 V		
Phase voltage	110 V	—	3P4W : 0 to 150/√3 V 1P3W : 0 to 150 V	Less than 1 % of full scale	3P4W : 0.0 to 57.7[%] 1P3W : 0.0 to 50.0[%]
	220 V	—	3P4W : 0 to 300/√3 V 1P3W : 0 to 300 V		
	440 V	—	3P4W : 0 to 600/√3 V		
Active power	110 V	5 A	-1 to 1 kW ([12])	Less than 0.3 % of the rated	ΣP : -100.0 to 100.0[%] P_1, P_2, P_3 : -33.3 to 33.3[%]
	220 V		-2 to 2 kW ([12])		
	440 V		-4 to 4 kW ([12])		
	110 V	1 A	-200 to 200 W ([12])	Less than 0.5 % of the rated	
	220 V		-400 to 400 W ([12])		
	440 V		-800 to 800 W ([12])		

Note([10]) Low input cut value of the N-phase current is twice.
Note([11]) The polarity of the current (power flow) is the same polarity as the power ΣP.
Less than 20% of the voltage full scale, then output as the incoming side.
Note([12]) 1P2W : Active power measurement range is 1/2 of the above.
3P4W : Each phase of the active power measurement range is 1/3 of the above.
0 to +P or 0 to -P or -P to +P, can be set.

Measurands	Rated voltage Rated current		Measuring range	Low input cut	Display
Reactive power, Reactive power (power flow)	110 V	5 A	LEAD 1 to LAG 1 kvar (13)	Less than 0.3 % of the rated	ΣQ : -100.0 to 100.0[%] Q_1, Q_2, Q_3 : -33.3 to 33.3[%]
	220 V		LEAD 2 to LAG 2 kvar (13)		
	440 V		LEAD 4 to LAG 4 kvar (13)		
	110 V	1 A	LEAD 200 to LAG 200 var (13)	Less than 0.5 % of the rated	
	220 V		LEAD 400 to LAG 400 var (13)		
	440 V		LEAD 800 to LAG 800 var (13)		
Apparent power	110 V	5 A	0 to 1 kVA (14)	Less than 0.3 % of the rated	ΣS : 0.0 to 100.0[%] S_1, S_2, S_3 : 0.0 to 33.3[%]
	220 V		0 to 2 kVA (14)		
	440 V		0 to 4 kVA (14)		
	110 V	1 A	0 to 200 VA (14)	Less than 0.5 % of the rated	
	220 V		0 to 400 VA (14)		
	440 V		0 to 800 VA (14)		
Power factor, Power factor (power flow)	110 V 220 V 440 V	5 A 1 A	LEAD 0 to 1 to LAG 0 LEAD 0.5 to 1 to LAG 0.5 LAG 0 to 1 to LEAD 0 LAG 0.5 to 1 to LEAD 0.5	Less than 20 % of the voltage full scale, or less than 2 % of the rated current. Incoming power factor 1.	LEAD to LAG : -0.0 to 100.0 to 0.0[%] LAG to LEAD : 0.0 to 100.0 to -0.0[%]
Frequency (15)	110 V 220 V 440 V	—	45 to 55 Hz 55 to 65 Hz 45 to 65 Hz	Output lower nominal value in less than 20 % of the full scale voltage (Example : 4 mA)	45.0 to 65.0[Hz] Low input cut : 0.0[Hz]
Fundamental voltage	110V 220V 440V	—	Measuring range is same as "voltage". 3P4W, 1P3W : Phase voltage 3P3W, 1P2W : Line voltage	Less than 1 % of voltage full scale	Measuring range is same as "voltage". 3P4W, 1P3W : Phase voltage 3P3W, 1P2W : Line voltage
Active energy	110 V 220 V 440 V	5 A 1 A	0 to 999999999 kWh(MWh) By the setting and the full load power, position and unit of the decimal point (k/M) is changed	—	0 to 999999999 kWh(MWh)
Reactive energy	110 V 220 V 440 V	5 A 1 A	0 to 999999999 kvarh(Mvarh) By the setting and the full load power, position and unit of the decimal point (k/M) is changed	—	0 to 999999999 kvarh(Mvarh)

Note(13) 1P2W : reactive power measurement range is 1/2 of the above.
3P4W : Each phase of the reactive power measurement range is 1/3 of the above.
0 to LAG Q or 0 to LEAD Q or LEAD Q to LAG Q, can be set.

Note(14) 1P2W : Apparent power measurement range is 1/2 of the above.
3P4W : Each phase of the apparent power measurement range is 1/3 of the above.

Note(15) Line voltage U_{12} (3P3W, 1P2W) or phase voltage U_{1N} (3P4W, 1P3W) to measure the frequency.
Input frequencies can be measured from 10 to 180 Hz, but accuracy is guaranteed from 45 to 66 Hz.
Also, for measurements of 70 Hz or higher, an input of 40% or more of the voltage full scale is required.

11 Multi-transducer setting software (QT2-CS-01)

11.1 Outline

Multi-transducer setting software (QT2-CS-01) is a QT2-500/HSQT2-500 dedicated setup tool.
Software can be downloaded at the WEB site. (URL ; https://www.daiichi-ele.co.jp/)
The following data management is possible by connecting HSQT2-500 and PC with a USB cable.

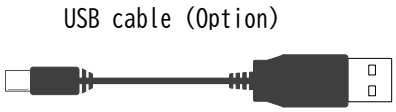
- Edit and save setting data.
- Write setting data into HSQT2-500.
- Read setting data from HSQT2-500.
- Output the setting data in CSV file.

11.2 Hardware requirements

Item	Specification
Personal Computer	PC-AT based computer
Operating System	Windows® 8.1 (32 bits / 64 bits) Windows® 10 (32 bits / 64 bits) Windows® 11 (64 bits)
CPU	32-bits processor : 1 GHz or more 64-bits processor : 1.6 GHz or more
Memory	32-bits processor : 1 GB or more, 64-bits processor : 2 GB or more
HDD	Free space 100 MB or more 〔If the Microsoft .NET Framework 4 Client Profile (32-bit) or Microsoft .NET Framework 4.5 (64-bit) is not installed. Free space of 300 MB or more〕
Display	Resolution : 1024×768 or higher, High Color (65536 colors) or higher
Interface	USB2.0
Communication port	USB (A) port ×1
Other	Mouse, Keyboard

11.3 System configuration

HSQT2-500



PC (QT2-CS-01 installed)

Installation, connection, such as the operation method, please refer to the included manual to QT2-CS-01.

12 Troubleshooting

Trouble	Probable cause	Handling
Power LED is not lights	In the 13th and 14th terminals, auxiliary power supply is not applied.	Please by applying an auxiliary power supply.
Display disappears	By auto off function, display is off	Please press the switch
Does not switch to the setting mode or test mode	By the lock function of the test / configuration.	Please to unlock. Pressing the MODE and SET at the same time for three seconds. Unlock or setting.
Error in analog output	Setting of VT rating and CT rating is wrong	Please check the VT/CT settings
	Output element setting is wrong	Please check the output element setting of each output CH
	Range setting of each measurement items is wrong	Please check the range settings for each measurement items
	Setting of analog output is wrong (0 to 5 V, 1 to 5 V, 0 to 10 V, 2 to 10 V)	Please check the settings of the analog output
	Wiring is wrong	Please check with the test mode wiring check function
Error in communication output	Setting of VT rating and CT rating is wrong	Please check the VT/CT settings
	Wiring is wrong	Please check with the test mode wiring check function
Error in active energy and reactive energy. (Display, Communication, Pulse output)	Setting of VT rating and CT rating is wrong	Please check the VT/CT settings
	Pulse rate setting is wrong	Please check the setting of the output pulse rate
	Wiring is wrong	Please check with the test mode wiring check function
